

Name: _____	Date of Birth: _____
-------------	----------------------

Please read and initial:

_____ Chemical peeling involves the application of a solution to the skin's surface to remove part of the outer layer of the skin, stimulate growth of new skin and reduce skin congestion, resulting in improved skin refinement.

_____ Benefits of regular peels:

- Improves the freshness, smoothness and colour of the complexion
- Improves acne, congestion and blocked pores
- Reduces the appearance of fine lines and wrinkles
- Improves texture of the skin and stimulates collagen renewal
- Can improve superficial scarring and irregular pigmentation
- Beneficial for the face, neck, hands and décolletage

_____ Peels will not improve the following conditions:

- Very deep wrinkles
- Very deep acne scarring
- Broken capillaries

_____ Risks and complications with very superficial peels are rare and typically mild; however, complications can occur in certain situations. Please advise the technician if any of the following apply to you:

- Prone to cold sores or have had a recent cold sore
- Allergic to aspirin or salicylic acid
- Use the medication, Roaccutane, for acne
- Pregnant or breast feeding
- Suffer from Diabetes or any immune disorder, including HIV
- Have a tendency to Keloid scarring or skin darkening with injury
- Have had complications with peels performed elsewhere
- Use products containing Retinol or Retin A
- Experience eczema or have very sensitive skin
- Have had recent facial surgery or laser skin treatment

_____ It is essential to use the SkinTx system for a period of three weeks prior to the SkinTx Jessner Plus Peel.

_____ It is normal to experience a strong tingling sensation on peel application, which can last for up to 10 minutes. Immediately after peel application, the skin may appear slightly pink and feel tight. Notify the technician if extreme burning or discomfort is felt. Visible peeling, if it occurs, is usually complete in 5 to 7 days. Peels are not recommended for 7 to 10 days before an important social engagement.

_____ You will be given written aftercare instructions. It is important to follow these instructions fully. These are designed to give you an optimum outcome and reduce the risk of any problems. If you have any questions, or any uncertainty about any aspects of having a peel, please ask your technician.

Please Note: Your skin can not come in contact with water for 12 hours after your treatment

I hereby consent and authorize that the Service Provider at this Medi-Spa may perform the following treatment of: SkinTx Jessner Plus Peel. I understand the nature of the procedure. I confirm that all risks and benefits of the procedure have been explained to me and are fully understood by myself. I acknowledge that I have been advised of the following side effects – flaking skin, minor redness and if prone, the activation of cold sores.

For the SkinTx Jessner Plus Peel only, as instructed, I have used the SkinTx system for at the past 3 weeks.
